## **GREENLEE OFFERS NEW HRD LINE OF GROUND ROD DRIVERS**

ROCKFORD, Ill., October 25, 2003 – Greenlee now offers a new line of Fairmont HRD series ground rod drivers, designed to work faster when the soil is hard or rocky. The Fairmont HRD series ground rod drivers are lighter, but still supply plenty of power especially when there's the need to stack the rods.

The HRD series ground rod drivers come with dual guide rods that provide excellent control for driving rods straight, and with the remote on/off valve, makes it easy to control the depth of the rod. The deep rod opening and smooth operation ensure that the driver will not jump off the rods.

The drivers are available either with a 5/8" (16 mm) or one-inch (25 mm) opening for the rods. Dual guide handles allow for good control and a lifting eye for use with a hoist. The HRD drivers can be operated either from hydraulic circuits on trucks or from stand-alone hydraulic power units.

For more information on the HRD ground rod drivers, or other tools in the Fairmont line, contact Greenlee, a Textron company, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at [www.greenlee.com](http://www.greenlee.com).
